BADETTY BROTHERS

Huntington New York

TRADE LIST FOR 1938

INTRODUCTION

The following list of Dahlias offered for 1938 contains many of our introductions that have proved of great value to growers in keeping their collections up to date with the most satisfactory and profitable varieties. It contains also a representative collection of other new Dahlias of proved merit.

The great interest being shown in miniatures and various types of small flowering Dahlias and the success with which our offerings of recent years have been received, prompt us to select a number of our latest novelties in the small types and in a wide range of colors and offer them to our customers. These have all been proved to possess real merit, having long stems and unusually thrifty plant growth and together with our previous introductions, comprise a most comprehensive collection of small flowering Dahlias.

NEW MINIATURES

DEANNA, MFD. The most delightful shade of clear pink, so seldom seen in a dahlia, makes this little gem stand out among all others. The perfectly formed blooms are produced in abundance and have long stems which hold them well above the foliage. Plants are strong and well branched.

Roots \$1.65 ea.; 3 for \$3.75.

ROSALIE WHITE, MFD. This is a charming combination of white with clean cut bands of light purple or deep rose. The background is pure white from the tips to near the base of petals where there is a slight trace of creamy-white. Bands of light purple extend up the edges of petals from near the base to within $\frac{1}{4}$ " from the tips leaving the tips all white. The blooms are perfect, have long stiff stems and a pleasing, dainty color combination. The three foot plants are free flowering and make a vigorous growth.

Roots \$1.00 ea.; 3 for \$2.25.

CORINNA, MFD. This clear yellow miniature is a favorite for its pleasing artistic formation. The blooms average about $2\frac{1}{2}$ " with a depth of $1\frac{1}{2}$ " and are held on stiff, wiry stems. The plant is a healthy, strong grower from 3 to 4 ft. in height. Altogether an excellent flower for exhibition and unsurpassed for cutting.

Roots \$1.00 ea.; 3 for \$2.25.

ROBBY, MFD. The color of this new miniature is a deep rich Autumn red with a darker red center. It is excellent for cutting and is most remarkable for its sturdy growth. The plants grow $5\frac{1}{2}$ ft. high, are well branched with long stems and have luxuriant green foliage which makes a striking contrast with the rich red blooms.

Roots 65c ea.; 3 for \$1.50.

LANNIE, MFD. A very deep, clear, canary yellow. This is another unusually tall grower for a miniature dahlia. The blooms are held high in the air and are produced in great abundance and they can be cut in quantities each day for they develop very rapidly. Always a dependable one and sure to please.

Roots \$1.00 ea.; 3 for \$2.50.

LITTLE DUKE, MFD. Color a very deep, rich Burgundy red. Bush 4 ft. high with extremely dark leathery foliage. Very resistant to insects and adverse growing conditions. The contrast between the rich red blooms and the dark green foliage is very pleasing.

Roots \$1.00 ea.; 3 for \$2.50.
like it in form of bloom and plant growth. The petals are

NEW MINIATURES

PAULA, MFD. This is an excellent little formal type of a clear rose pink color. The plant is an unusually vigorous grower with very dark green foliage. Blooms freely and is an extra good cutter.

Roots 50c ea.; 3 for \$1.25.

ORANGE GLORY, MFD. This is a beautiful deep orange colored decorative of beautiful formation. It is a very attractive one-tone shade and is very desirable for either shows or cutting. Perfect habit of growth.

Roots \$1.00 ea.; 3 for \$2.50.

BABY SAGAMORE, MFD. This we consider as near a 100% perfect dahlia as any we have ever grown. It is a very free bloomer with excellent long stems and a golden yellow color that it always in demand. It will cut more blooms per plant than any other variety and continue in bloom from early season until frost.

Roots 55c ea.; 3 for \$1.50; \$40.00 per 100.

CORALETTE, MFD. A pure one tone rose or coral-pink. This is an outstanding miniature and a color that has never been matched in a dahlia. The stems are long and stiff and the blooms are remarkable keepers. A truly great dahlia which is popular in all the flower shops.

Roots 80c ea.; 3 for \$2.25; \$60.00 per 100.

ECLIPSE JR., MFD. A perfect formal type and a color similar to Golden Eclipse. While this miniature has taken many prizes in the shows, it is also a valuable addition to our cut flower collection. It is a sturdy, healthy grower and blooms freely all the season.

Roots 40c ea.; 3 for \$1.05; \$30.00 per 100.

MARCELETTE, MFD. This variety is similar in some ways to Irene but more of a deep fawn color. It is a tall grower and the perfectly formed blooms are held high on long stems.

Roots 40c ea.; 3 for \$1.05; \$30.00 per 100.

HENRIETTA, M Dup. A most attractive novelty that is excellent for artistic decorations. The flowers are white with yellow centers and petals are margined with orange. Plants are tall growers and hold the flowers high on long, stiff stems.

Roots 35c ea.; 3 for 90c; \$25.00 per 100.

TAMARA, M Dup. A seedling of Henrietta and exactly margined with brilliant red instead of orange.

Roots 55c ea.; 3 for \$1.50; \$40.00 per 100.

RECENT INTRODUCTIONS

JAMES KIRBY, ID. Another successful year to its credit and JAMES KIRBY holds its leading position among the best commercial varieties of the day. All who have grown this dahlia know that the brilliant scarlet with rich ruby shading creates a sensation and makes it a favorite among florists.

If you have not grown Kirby be sure to give it a trial as the experience of others has proved it to be more satisfactory and above all more profitable for the better class trade.

Roots 30c ea.; 3 for 75c; \$22.50 per 100.

MRS. ALFRED T. BUNYARD, FD. This pure deep yellow is one of our more recent introductions much in favor for its richness of color. It has large perfect blooms of strikingly artistic formation. The plants are strong growers and come into bloom early, producing a great number of fine flowers throughout the season. For those wishing a real deep yellow with exhibition and cutting qualities, this dahlia is invaluable.

Roots \$1.25 ea.; 3 for \$3.00.

GOLDEN ECLIPSE, FD. Imagine a glorified Sagamore, large, perfect, formal decorative blooms growing on a sturdy 6 ft. plant with stems up to 4 ft. in length and you can picture this superb dahlia. The color and long keeping qualities make this a valuable variety for the commercial grower.

Roots 20c ea.; 3 for 54c; \$15.00 per 100.

NATHAN HALE, FD. For a deep Autumn shade or bronze we have found Nathan Hale to be the best. We grow more of this variety than any other and have a large demand for the flowers. It is a good keeper and handles well. The plants are strong and exceptionally healthy. Early planting is recommended.

Roots 8c ea.; 3 for 21c; \$5.00 per 100.

NEW POMPONS

CHERIRDOR, Pom. This new pompon sets a new high standard for dahlias in this ever popular class. The color is a distinctive shade of deep, orange red that lends itself so well in Autumn decorations. An added feature is the unusually long stems that hold the blooms high above the foliage. Plants are sturdy and tall and produce an abundance of bloom. This is one that will surely please. Roots \$1.00 ea.; 3 for \$2.50.

GERDA, Pom. Another new pompon of unusual merit. The blooms are a pleasing creamy yellow, shading to a rich canary at the base of the petals producing a satisfying effect. Plants are bushy and of medium height with rich green foliage and always grow well under any conditions.

Roots \$1.00 ea.; 3 for \$2.50.

LITTLE ELK, Pom. Color a light bronze or amber. Very sturdy plant producing an abundance of beautiful Autumn colored blooms on long stems. Bush 3 ft. with rich green foliage and will grow well in dry weather and is insect resistant. Roots \$1.00 ea.; 3 for \$2.50.

MISS ALMA, Pom. A most pleasing combination of lavender and white. Blush white with edges and tips of petals shaded with deep lavender. Plants are very strong about 3 ft. tall and produce many of the dainty colored blooms at one time. Roots \$1.00 ea.; 3 for \$2.50.

CORAL GLOW, Pom. The pure coral-pink of this new pompon blends so perfectly with the rich gold of the lower half of the petals it produces a bloom of rare beauty and brilliancy. The plant is very sturdy and tall and is covered with flowers throughout the season. The stems are unusually long and carry the flowers well above the deep green foliage. A new one that you will want. Roots \$1.00 ea.; 3 for \$2.50.

CARNATION, Pom. Here is a new pompon of unusual merit. The color is a most delicate blending of pink and white that is so popular in the Carnation. The wavy formation of the petals add to the artistic beauty of the flower. Habit of growth is excellent and the blooms are produced freely on very long stems. Roots \$1.00 ea.; 3 for \$2.50.

ORANGE GEM, Pom. This is a very small pompon of close compact formation. The color is a true, clear orange with no shading and the flowers never show an open center. Here is a new pompon for those wishing to exhibit in the shows. Plants are sturdy, healthy growers and produce an abundance of bloom. Roots \$1.00 ea.; 3 for \$2.50.

FELECIA, Pom. A new pompon that is much admired for its radiant brilliancy of color. Deep buttercup yellow brushed over with fiery scarlet. This blending of bright colors creates an effect that always attracts immediate attention. The plants are perfect and the long, stiff stems hold the blooms well above the dark green foliage. Roots \$1.00 ea.; 3 for \$2.50.

ROSE GRAY, Pom. (Lee 1937). This is an outstanding addition to the pompon class and a decidedly new color. Silvery white with a suggestion of rose. Roots \$1.00 ea.; 3 for \$2.50.

BONNY, Pom. (Lee 1937). A beautiful little pink that is a real addition to this limited color class.

Roots 75c ea.; 3 for \$2.00.

BETTY ANN, Pom. (Johnson 1936). A soft clear pink exhibition pompon with a fine list of winnings to its credit. One of the best of the new pinks. Roots 50c ea.; 3 for \$1.25.

MORNING MIST, Pom. A Certificate of Merit dahlia and our introduction for 1936. Color, white with rosy lavender at the center. Sturdy plants, a profuse bloomer with extra long stems. One of the most valuable contributions in this class in years. Roots 18c ea.; 3 for 45c
